Please Keep in Mind:

- For best results, all photos should be at least 300 dpi. (Please do not use photos taken off the internet, as these are typically only 72 dpi and not suitable for printing purposes). If you are scanning photos, please be sure to set your scanner to 300 dpi and scan as a .jpg before scanning.
- Copyrighted material (such as Disney characters) cannot be reprinted in the yearbook without written permission.
- We are only accepting dedications through the online website and not at the school. You can still create your daughter's message in another program such as Photoshop and upload it through the online ad creator as a single image. Just be sure that it is still in a .jpg format and at least 300 dpi and an 8x10 image.
